

When it comes to flooring, We've got you covered.

Maintaining Your Carpet's Beauty

- The best way to ensure long-lasting beauty, comfort and durability in your carpet is to vacuum it regularly, as it prevents soil from becoming embedded in the carpet's pile.
- Depending on the type of carpet you have, you'll want to use a vacuum with a rotating brush, a beater bar or suction only.
- When vacuuming high pile or premium soft carpets look for the following features that will allow you to easily maintain your carpet:
 - Adjustable Height – Use the highest setting where appropriate
 - Efficient Airflow – Avoid vacuums with very concentrated or sealed suction
 - Large Wheels allow the appliance to glide easily across the carpet
- For more information on how to select a vacuum, [click here](#).
- Consider professional cleaning every 12–18 months, depending on traffic and other use factors, frequency of vacuuming and whether the carpet is a light or dark color.
- Use scissors to clip sprouts and snags; do not pull them or you may damage the carpet.
- To remove a dent caused by heavy furniture, stroke carpet with the edges of a coin. You can also use a hair dryer or a steam iron to gently raise the dented area while you tug upward on the tufts.
CAUTION: DO NOT LET THE IRON TOUCH THE CARPET..
- If your carpet is burned, remove the tops of the dark, burnt fibers with curved fingernail scissors. If the burn is extensive, the carpet may require patching or replacement.
- If a flooding occurs from a burst pipe, washing machine overflow or other leak, the carpet needs to be dried, front and back, by a professional cleaner with the proper equipment.
