

When it comes to flooring, We've got you covered.

## Care and Maintenance

Specific care instructions will be determined by the type of finish you use, but here are some general guidelines:

- Place walk-off and walk-on mats at each exterior doorway.
- Attach felt pads under all furniture legs and other heavy moveable objects.
- Dust mop and vacuum the floor often; wet mop (avoiding excessive moisture) occasionally.
- Avoid using oil soaps or sprays or wax-based cleaning solutions; typically the manufacturer of your finish will have a recommended cleaning product. Sometimes the simplest ingredients are the best, such as damp mopping with a mixture of white vinegar and water.
- Keep the areas under furniture and rugs clean. Dirt can wear into the finish causing it to break down over time.
